

SOLUTIONS

We offer a variety of solutions so you get peace of mind, including complete compressed air solutions.

- 5 HP – 600 HP Rotary Screw Compressors
- Air Demand Analysis (ADA)
- Kaeser Energy Saving System (KESS) Evaluation
- Preventative Maintenance
- Predictive Maintenance
- Kaeser SmartPipe
- Vacuum Pumps
- Receiver Tanks
- Condensate Drains
- Clean Air Treatment
- Blowers
- Flow Meters
- Rental Equipment
- Turnkey Installations

ABOUT ELEVATED INDUSTRIAL SOLUTIONS

Elevated Industrial Solutions, formerly Palmetto Compressors and Compressed Air Technologies (CAT), is your trusted partner, making businesses more efficient and effective. We provide compressed air systems and services, coating and finishing systems, and industrial supplies. Our services include helping your company improve processes and recommending new products. We'll train your staff and manage some inventory so you don't have to wait on lead times or worry about supply chain issues. Nationwide, we're the catalyst for helping American companies and people grow.

SIGMA PROFILE ROTARY SCREW

Kaeser’s proprietary Sigma Profile was introduced in 1975. It’s up to 20% more efficient than conventional screw designs. Kaeser continues to refine and improve the airend design, and today’s optimized Sigma Profile airends offer unparalleled performance.

Larger airends turning at slower speeds are more efficient and deliver more compressed air for the same drive power. Kaeser’s design philosophy is to develop slower running airends with optimized profiles that can pay for themselves in a short period of time with increased energy savings.

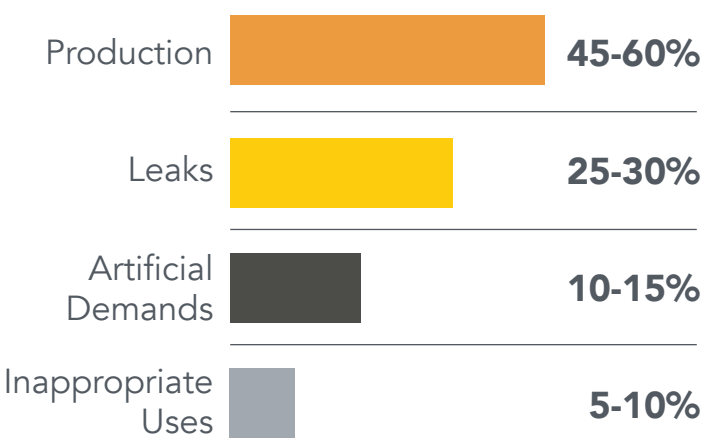

BENEFITS

- Up to 20% more air per kilowatt
- Excellent airend inlet channel flow characteristics
- Long operational life due to precision-aligned, top-quality bearings
- Airends are precision machined to very fine tolerances on high-precision grinding machines for increased performance reliability.

AIR DEMAND ANALYSIS

Kaeser’s Air Demand Analysis (ADA) is our unique approach to comprehensive air system audits. Our proprietary ADA program provides a complete and accurate air demand and consumption profile without interrupting daily plant operations. We can tailor this audit to any size system, too.

FULL-SERVICE MECHANICAL CONTRACTOR

We offer piping and equipment installations. Ask to see our portfolio!
